

Module	Goals	Techniques
Module 1 (Motivation)	Strengthen motivation to change and treatment readiness before addressing criminogenic needs.	• Motivational Interviewing (Miller & Rollnick, 50): open questions, reflective listening, appreciation • Elicit 'change talk' and 'confidence talk' • Handle resistance; use summaries
Module 2 (Supervision and social relationships)	Build positive social network, reduce resistance to rules and community supervision.	• CBT to encourage social network building • CBT to support attitude change
Module 3 (Emotion management)	Reduce impulsiveness and improve coping with stress and negative emotions.	• DBT (Linehan, 62): emotion regulation, distress tolerance • ACT (Hayes et al., 63): acceptance of negative experiences, meaningful life focus
Module 4 (Problem solving)	Improve social problem-solving skills; promote positive problem orientation and rational problem-solving style.	• Problem-Solving Therapy: positive problem orientation and rational problem-solving (PST; Nezu et al., 74)
Module 5 (Offense-supportive attitudes)	Change attitudes supporting sexual offending against children.	• Cognitive restructuring: identification, reframing, Socratic dialogue, compare new vs. old beliefs (Beck) • RNR: adapt to individual needs by choosing 3 out of 16 pre-defined cognitive distortions
Module 6 (Sexuality)	Reduce sexual preoccupation, emotional congruence with children, and sexual interest in and fantasies about children.	• CBT to influence sexual thoughts/fantasies • Promote adult-oriented interests
